## What is SkibidiDoge?

SkibidiDoge (\$SKBD) is a Solana-based meme coin engineered for maximum degen energy. There are no VC backers, no long-winded roadmaps, and absolutely zero chill. We flush the norms and summon the chaos.

## Tokenomics

Total Supply: 1,000,000,000 \$SKBD

- 50% Liquidity Pool
- 20% Airdrop Wallet
- 15% Founder Allocation
- 15% Marketing Reserves

There are no stealth burns - if we burn, you'll see it on SolScan. LP is locked. Transparency is key.

## How to Buy

Step 1: Load your Phantom wallet with SOL.

Step 2: Head to Raydium (or your favorite Solana DEX).

Step 3: Swap SOL for \$SKBD using our official contract address:

## Why We Flush

Every coin has a mission. Ours is to entertain, energize, and elevate the meme coin experience. We're not chasing utility - we're chasing hilarity, virality, and that sweet flush of dopamine when the chart goes parabolic.
